Jen,

Let's target 10 if that works for Bob. I've reserved a room at the EPA offices (13 heron in seattle) if that works for you all.

Much appreciated-you too.

S

Hi Sean,

Bob and Ryan are available to attend a meeting in Seattle on Tuesday, February 27. We recommend scheduling 2.5 hours. Do you want to hold the meeting at EPA's Seattle office? Given that Bob is traveling to Seattle, can we begin the meeting at 9:30 or 10 am?

Please let me know if you are ready for me to send a meeting invite.

Thank you and have a nice day!

Jen Mott

Hello again Jen, Oops, I take that back; looks like I need to stay in town that week (b) (6). So Tuesday 2/27 in Seattle works best for me if possible. Thank you. S

Thanks very much Jen. I'll be on leave the entire week of 2/19, so looking at the following week --the day is pretty packed on 2/28 when I'll be in portland, but how about the afternoon of Tuesday 2/27 where I can be in Portland? I'll reach out to see if our Portland office or building conference room are available.

**Subject:** Gasco Sediments: Scheduling February Presentation to TCT

Hi Sean,

I talked to Bob and Ryan and they are available to present the post-dredge and post-cover verification approach to the TCT during the following dates: Wednesday, February 21 – Friday, February 23 and Monday, February 26 – Wednesday, February 28. They recommend reserving a two-hour time slot for the presentation. Bob and Ryan can attend a meeting in Seattle or Portland.

They propose holding this meeting later in February to provide sufficient time for NW Natural and EPA to finalize the approach based on the discussions during the January 10 meeting. Our team is currently revising the PowerPoint presentation based on the discussions during the January 10 meeting to propose a post-cover sampling approach that includes the residual layer and data uses. NW Natural will submit the revised presentation to the EPA team next week for your review and comment.
